

Project Delivery

Summary

Work on a range of clinical studies for small to large pharmaceutical and biotech clients while feeling valued and supported in your day-to-day work.

Personality

- Passion for high quality deliverables.
- Like working as part of a team.
- Attention to detail.

Responsibilities

- Prepare and review study documentation including protocols, SAPs, TFL shells and analysis dataset specifications.
- Input into choice of appropriate statistical methodology.
- Manipulate, summarise and analyse clinical trial data using a variety of statistical techniques.
- Program/validate statistical tables.
- Mentor more junior members of the team.
- Participate in internal and client meetings.

Daily Interactions

- Build an effective collaborative relationship with the client, managing their expectations, whilst being the primary point of contact. Become their go-to person to provide stats consultancy advice.
- Lead the internal Veramed team to deliver on time, to budget, high quality work.
- Liaise with internal management to define scope and support proposal development.
- Provide support and mentoring for more junior statisticians on the team.

Opportunities

- Development to Lead Statistician.
- Gaining experience across a range of therapeutic areas and/or phases.
- Presenting at conferences.
- Developing and executing innovative study design and/or efficiency optimisation ideas.
- Peer mentoring and/or line management.
- Contributing to business process improvements and authoring/presenting internal training.
- Contributing to initiatives that consider employees, the environment and our local communities as part of our B Corp accreditation.

- Understanding of clinical drug development process, relevant disease areas, endpoints and different study designs.
- Awareness of industry and project standards & ICH guidelines.
- Excellent verbal and written communication skills.
- Interpersonal/teamwork skills for effective interactions.
- Proficiency in data handling using SAS or other statistical software (e.g. R).
- Self-management skills with a focus on results for timely and accurate completion of competing deliverables.
- Demonstrated problem solving ability and attention to detail.
- Ability to work independently and as part of a team.
